

Linc Life Project

No one behind!

Concrete learning materials to train life long basic skills for persons with learning disabilities

4 December 2020 (10.00 – 11.45 CET)
Online on Zoom

Background

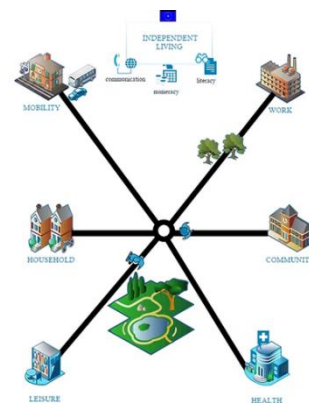

The project involves 6 participating countries across the EU. It started in September 2017 and ends by December 2020.

The objective of this initiative was to create a **set of modules** which will **assist persons with an intellectual disability** to engage independent living.

This will be achieved by focusing on the current need to enhance communication, literacy and numeracy skills of persons with serious Learning problems so that they will have the means to realize their inherent rights for independent living.

Also persons with intellectual disabilities have the right to improve their key competences.

For more information and the training materials free to download see: <https://www.mfopd.org/linc-life>
